CAREER OBJECTIVE

2026 BCA graduate and backend developer intern with hands-on experience building REST APIs, MVC-based services, and full-stack features for a live production application. Built and shipped a Prisma/PostgreSQL-backed data access layer, a Node.js/Nest.js/Next.js web application serving 1,000+ users, and Dropbox-integrated file handling for 500+ users. Comfortable across Java, JavaScript, and SQL, with strong fundamentals in OOP and MVC architecture. Seeking to grow into a full-time software engineering career through Google's Software Application Development Apprenticeship, contributing to production codebases while learning from experienced engineering teams.

SKILLS

Programming Languages: C, C++, Java, JavaScript

Backend & Web: Node.js, Nest.js, Next.js, Servlets, JSP, REST APIs, HTTP, HTML, CSS

Databases & ORM: PostgreSQL, MySQL, Prisma ORM

Concepts: Object-Oriented Programming, MVC Architecture, API Design

Tools: Git, VS Code, Apache NetBeans, Google Workspace

Soft Skills: Teamwork, Problem Solving, Time Management, Cross-team Collaboration

EXPERIENCE

Backend Developer Intern - JK Innovative Pvt. Ltd. **Jun 2025 - Sep 2025**

- Built a REST API in Node.js integrated with PostgreSQL, supporting ~100 user requests per day for a live Career Portfolio Generator platform.
- Designed a Prisma ORM data access layer that cut database query latency by 30%, improving overall application performance.
- Delivered a Next.js frontend with a Nest.js backend serving 1,000+ users at 99.9% uptime and ~200ms average response time.
- Implemented MVC architecture and integrated a MySQL database for core application logic.
- Collaborated with a 5-person team to integrate Dropbox APIs for file sharing and storage across 500+ users, maintaining data consistency.
- Used Git for version control, averaging 20+ commits per week and resolving merge conflicts to keep delivery on schedule.

PROJECTS

Food Rescue AI - Full-Stack Food Donation & NGO Matching Platform

- Built a full-stack platform in Java (Spring Boot, Spring Data JPA/Hibernate) with Thymeleaf dashboards and a MySQL/PostgreSQL backend to connect food donors with nearby NGOs and shelters in real time.
- Designed a rule-based scoring system to allocate donations by proximity, expiry window, and NGO capacity, using the Google Maps Geocoding and Distance Matrix APIs for route and distance calculations.
- Implemented donor registration and listing flows, plus admin/NGO dashboards with real-time tracking across a four-stage lifecycle (Pending -> Allocated -> Claimed -> Rescued) and impact reporting.

Career Portfolio Generator for Students

- Built with Java, Servlets, JSP, HTML, CSS, and MySQL, following MVC architecture.
- Implemented dynamic form handling and content rendering to let students generate shareable portfolio pages.

EDUCATION

Bachelor of Computer Applications - Sant Gadge Baba Amravati University **Aug 2023 - 2026**

Amravati, India | CGPA: 6.5/10

12th Board (HSC) - Nandgaon High School and Junior College **May 2021 - May 2022**

Nandgaon Khandeshwar, India | Percentage: 63.33%

10th Board (SSC) - Nandgaon High School **May 2019 - May 2020**

Nandgaon Khandeshwar, India | Percentage: 73.40%

CERTIFICATIONS & PROGRAMS

Active participant, Google Cloud Arcade - public profile: skills.google/public_profiles/64a46582

ACHIEVEMENTS

- Won 1st Prize in a College Level Coding Competition.
